REASONS FOR ALLOWANCE

3. In view of the new arguments presented in the Appeal Brief filed September 3, 2009, the following is an examiner's statement of reasons for allowance: The prior art reference, US Patent No. 6,172,135 to Fraser et al ("US'135"), does not recognize the critical content of styrene unit in the first shell polymer. US'135 teaches a core-shell particles comprising a first shell polymer containing from zero to 25wt% of a styrene monomer unit (claim 1), preferably 14-25 wt% (claim 6). As shown in Tables 1 and 2 of the instant specification, in Example VB1 where the styrene monomer in the first shell (i.e. Emulsion 2) of the core-shell particle is about 22% (3453 g of styrene divided to (15655 + 172g) of total acrylate monomers), which is within the general and preferred range taught in US'135 but outside the claimed range of styrene monomer, the impact strength at below 0°C of the resulting core-shell particle is significantly lower than that of the core-shell particle according to the claimed invention. See Table 2 of the instant specification. Similarly, in Example VB2 where the styrene monomer is not present in the first shell of the core-shell particle, the impact strength at below 0°C of the resulting core-shell particle is significantly lower than that of the core-shell particle according to the claimed invention. See Table 2 of the instant specification.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to H. (Holly) T. Le whose telephone number is 571-272-1511. The examiner can normally be reached on 12:30 p.m. to 9:00 p.m. (EST), Mondays to Fridays.
